## From the Principal's Desk

I would like to classify the students in to 4 broad categories.

1. Bright and talented with right attitude and properly trained and motivated.
2. Bright and talented but lazy, improper attitude, less responsive for training.
3. Not so talented but hardworking and right attitude and motivated through training.
4. Not talented, lazy and improper attitude, and not responding to training.

It is obvious that the first category of students will be on top where ever they are and whatever they do. They will be most successful in life and career.

The second category of students somehow manages through last minute preparation. They do not utilize their full capacity and hence their achievements will be limited.

Students falling in these two categories with excellent performance at +2 levels and entrance examination also join our college and continue their good performance. But most of the students, in my opinion, in a self financing engineering college like Sreepathy, at present, may not fall in the above two categories.

We at Sreepathy create opportunities and facilities, so that our students do not fall in category 4.

*Dear students,*

*Make sure that you do not land up yourself in category 4 and repent later.*

Best wishes

**Dr. S P Subramanian**
