Web and UI Design Mockup-Photoshop Workshop

Date: 26 January,2018

The IEEE SIMAT SB organized a one-day workshop on Web and UI design Mock Up- using Photoshop on 26th January 2018. The workshop was mainly aimed to enlighten the students with scope of Photoshop in this growing technical and managerial world. As planned, the program began at 10am with an interactive session on Photoshop which was led by Mohammed Irfan(S4 CSE, SIMAT, An active IEEE Student Volunteer), a freelance graphic designer who has got immense experience in designing and Photoshop related functions.

The workshop started out after the introductory session. The basics like tools and adjustment layers were taught in the beginning as almost all the participants were beginners. After that participants were given a basic overview about the different layering systems. After that a mockup of a website was designed by all the volunteers.

The workshop was designed in such a manner that both the participants and the speaker, enjoyed being part of the workshop. All the delegates were active and weren't reluctant to clear doubts. The workshop was concluded at 4pm. Around 25 students attended the workshop. All together, the program received positive feedback from the participants.
